Committed Home HealthCare Scope Of Practices

Our office hours are from 9 AM to 5 PM, six days a week. However, our healthcare team - including nurses, physiotherapists, occupational therapists, and speech therapists - works on pre-arranged schedules, as agreed upon by families and approved by the DHA and insurance companies. For any questions, inquiries, or emergencies, we offer a 24/7 hotline.

Staff are eligible for overtime as needed and upon acceptance.

We serve the entire Dubai Emirate and can extend services to other Emirates upon request.

We provide continuous, part-time, or “intermittent” skilled nursing care:

Part-time or intermittent care is provided fewer than 7 days a week or less than 8 hours per day.

Continuous skilled nursing care is delivered by licensed nurses for 12 or 24 hours a day, either for a limited or extended period, depending on the patient's condition and a written agreement with management and payers.

Our home health nurses offer direct care, while also educating patients and their caregivers on care practices. They oversee, assess, and evaluate the quality of care provided to ensure the best outcomes.

The key functions of the CHHC models include:

- **Care along the continuum – infant to geriatric**
- **Family Health Education.**
- **Nursing services that include:**
 - Case management
 - Skilled Nursing Care

Speech Therapist

Optimized Staffing and Care Coordination at CHHC

Comprehensive Patient Care System: All staff operate within a total patient care system to ensure comprehensive coverage.

Staff Division: The staff is divided into teams or groups, assigned to cover morning, evening, and 24-hour services.

Flexible Staffing: The number of staff per group is adjusted based on the patient's needs and visit frequency. Staff numbers are revised weekly to ensure appropriate coverage for required patient care hours.

Case Management & Team Leadership: A case manager and team leader from each specialty manage staff arrangements and ensure proper coordination.

Nurse-Friendly Scheduling: The nursing schedule is designed to be nurse-friendly, ensuring both continuity of care and adequate rest periods for optimal performance.

Nursing Leadership: Nurses are led by a nurse manager and a team leader for each group, responsible for supervision and maintaining the continuity of care during each shift.

Shift Assignments: The nurse manager (NM) assigns roles to all staff and specialties for each shift, with periodic reviews to ensure efficient coverage.

Continuity of Care: The staffing plan is focused on ensuring continuous care from patient admission to discharge.
